TITLE : RECEIVER SELECTING
AUTOMATICALLY BROADCAST
STATION

ABSTRACT : PURPOSE: To renew channel selection of broadcast stations automatically from a current position of a mobile body obtained by a satellite of a global positioning system(GPS).

CONSTITUTION: A channel is selected via an automatic channel selection processing section 3 controlling automatic channel selection based on a current position of a mobile body obtained from a GPS and information of each broadcast station stored in advance in a broadcast station information storage medium 2. Then a broadcast reception antenna 8 is directed via an antenna drive mechanism 6 as soon as the broadcast is received.
